

*Global Value Chains – European
competitiveness in a global arena
Perspective from the Factories of the
Future PPP*

9 June 2016
WIRE 2016

Context: EFFRA and The Factories of the Future PPP

	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	Nr of projects	Cumulative total
FoF-2010		25 projects				post-project impact & investments													25	25
FoF-2011		36 projects				post-project impact & investments													36	61
FoF-2012			37 projects				post-project impact & investments												37	98
FoF-2013				53 projects			post-project impact & investments												53	151
FoF-2014					25 projects			post-project impact & investments											29	180
FoF-2015						25 projects			post-project impact & investments										28	208
FoF-2016							xx projects			post-project impact & investments										
FoF-2017								xx projects			post-project impact & investments									
FoF-2018									xx projects			post-project impact & investments								
FoF-2019										xx projects			post-project impact & investments							
FoF-2020											xx projects			post-project impact & investments						
FoF-2021												xx projects			post-project impact & investments					
FoF-2022													xx projects			post-project impact & investments				
FoF-2023														xx projects			post-project impact & investments			
FoF-etc..															xx projects			post-project impact & investments		

- 208 Projects to date.
- ~ 1,500 organisations participating
- High involvement of SMEs: 200+
- Majority of projects feature demo activities
- 600+ results have been reported on EFFRA Innovation Portal
- Close to the market exploitation of project results
- Project results enhancing existing products

Towards Resilient Production Networks

Are your production networks robust, adaptive and reactive?

How can your company better respond to change and react to new business opportunities?

See the results of 3 “Factories of the Future” projects that offer advanced tools to aid decisions in complex global manufacturing scenarios. Mail Frank-Walter.Jaekel@ipk.fraunhofer.de to register your interest or contact r.i.young@lboro.ac.uk for further information
